1-) How is the universe described at the beginning of this passage?

It is pictured like a well-run kingdom or city where everything has an ordered job.

2-) What does that comparison teach about the way the universe works?

It teaches that its parts are organized, purposeful, and under one command.

3-) Why is this description important for understanding tawhid?

Because it supports the belief that one Lord is managing everything in unity.

4-) What everyday political examples are used to explain why shared rule leads to trouble?

It uses the examples of two kings in one land or two local leaders in one area.

5-) What principle about leadership is used to argue against polytheism?

One area cannot stay orderly if two separate rulers both claim control over it.

6-) How does the passage support that idea with human examples?

It shows that even human communities become unstable when more than one top ruler competes for control.

7-) What conclusion is drawn from comparing human rule with Allah's sovereignty?

If weak people refuse rivals over tiny power, then Allah would never allow anyone to share in His absolute rule.

8-) Why is the example of human struggle over power included?

It gives a familiar example showing that even limited authority resists being shared.

9-) What greater truth is inferred about Allah from that comparison?

His absolute power and sacred rule make partnership impossible.

8sinif supreme-sign-p78-2nd-chapter-1st-stopping-place-4th-truth-sovereignty - Set 2 - CEVAPLAR

The truth of absolute sovereignty.

5-) Why does the passage mention both the lowest soldier and the highest commander?

To show that one authority covers every level without exception.

6-) What political comparisons help readers picture that breakdown?

The examples of two kings over one country and two headmen over one district.

7-) What evidence from the world argues against that ruin?

We actually see harmony and order everywhere instead of collapse and chaos.

8-) Why is the dignity of sovereignty important in this discussion?

Because high rule is presented as something too noble to accept a competing partner.

9-) What does the passage conclude about the Lord of all creation?

He would never let anyone take part in His sacred and absolute sovereignty.

8sinif supreme-sign-p78-2nd-chapter-1st-stopping-place-4th-truth-sovereignty - Set 3 - CEVAPLAR

2-) How does the passage describe the condition of the universe as a whole?

4-) How broad is this rule according to the passage?

5-) What would be the result if more than one independent ruler handled the same creation?

6-) What verse-based argument is used against many gods?

If there were other gods besides Allah in the heavens and earth, everything would fall into ruin.

7-) What proof from observation is stronger in this passage: chaos or order?

It means every level of creation follows His command like disciplined forces under one ruler.

4-) Which parts of creation are included under this command structure?

Everything from atoms to plants, animals, and stars.

5-) Besides order, what other reason is given that sovereignty rejects rivals?

Rule has honor and majesty, so accepting an equal would go against that dignity.

6-) How does the actual condition of the universe answer that imaginary situation?

7-) What does that observed order tell us about Allah's affairs?

It tells us no partner is interfering in them.
